**Our reference** 20221123-HoKaPH

**Date** 23 november 2022

Dear Dr. van Beeck,

Thank you very much for the information you provided to the ECRM on 17<sup>th</sup> October regarding the new HoKa project 'Planetary Health'. The ECRM thinks that sustainable health is an important topic.

Although the current project will be focused on the *Erasmusarts 2030* curriculum, the ECRM notes that there may be possibilities to involve ReMa students at a later time as the project matures. Therefore, we wish you good luck with your project and look forward to receiving further information regarding electives and collaborations with ReMa students as they are developed.

With kind regards,

Dr. John Hays

Chair Education Committee Research Masters
