

# Am I allowed to go to campus?

Answer these 5 questions before you come to campus for scheduled education, a study place, or for work. Students and staff are expressly asked to follow the rules for their own safety and the safety of others.

## Test result is positive?

1

### Do you have complaints that fit the corona virus?

Nasal cold, coughing, sneezing, loss of smell / taste, chest tightness, fever.

Yes >

#### Stay at home and request a test at the GGD

– Stay at home while waiting for the test result.  
– Test result negative and free of complaints for 24 hours? Go to question 2.

No v

2

### Do you have a roommate with corona or have you been in close contact (longer than 15 minutes at less than 1.5 metres) with somebody with corona?

Yes >

If you have not been (fully) vaccinated or have not had corona in the past 6 months, stay home for 10 days and follow the instructions of the GGD Rijnmond at [www.ggdrotterdamrijnmond.nl/professionals/adviezen-corona-onderwijs/](http://www.ggdrotterdamrijnmond.nl/professionals/adviezen-corona-onderwijs/)

No v

If you have been fully vaccinated or have had corona in the past 6 months, it is advisable to stay at home for 5 days and then test, see the advice of GGD Rijnmond at [www.ggdrotterdamrijnmond.nl/professionals/adviezen-corona-onderwijs/](http://www.ggdrotterdamrijnmond.nl/professionals/adviezen-corona-onderwijs/)

3

### Do you have a roommate with (severe) complaints that fit with corona?

For example a fever or shortness of breath.

Yes >

If you have not been (fully) vaccinated or have not had corona in the last 6 months, stay in quarantine for 10 days and get tested if you have symptoms. If you test negative on day 5, you are welcome back on campus.

No v

If you have been fully vaccinated or have had corona in the past 6 months, it is recommended to test after 5 days in case of complaints and to keep your distance, avoid large groups and vulnerable people.

4

### Do you suspect that a fellow student or colleague who is on campus is infected with corona?

Yes >

Advise your fellow student/colleague to get tested. You can also report your suspicions to the study advisor or manager. He/she determines potential next steps.

No v

5

### Have you recently returned from a country with orange or red travel advice?

Yes >

It is mandatory to stay at home for 10 days after a stay in a very high risk area due to corona. This quarantine obligation also applies to travellers with a vaccination certificate or recovery certificate. A test on day 5 can shorten the length of your quarantine. See the website of the Government of the Netherlands for more information <https://www.rijksoverheid.nl/onderwerpen/coronavirus-covid-19/nederland-inreizen/in-quarantaine-na-aankomst-in-nederland>

## What to do if you are infected?

You and your housemates remain at home. You will be informed about this home isolation and the next steps by the GGD.

## Do I need to report an infection?

Students and employees have the option to voluntarily report an infection to their study advisor or manager. When this happens, this person gives his/her explicit consent that EUR may receive and process the information about the infection. Reporting an infection is not mandatory under privacy legislation. A notification does help us to keep our university community healthy and safe.

In this context, EUR does not store or distribute personal data and only uses a notification to prevent further spread of the virus. For example, by advising students from the same study group to be extra alert to corona symptoms. The report is not processed individually identifiably, which means that the report is not linked to the student or employee who made the report. Consent to process data can be withdrawn at any time.

## You are welcome on campus!

Students and employees can request free self-tests. Self-testing is optional, but recommended.

Students are only welcome for scheduled education or a reserved study place. Employees work from home in principal, unless the employee has to be present location-specific, scheduled education on campus, to perform location-related research or work.

While on campus, stick to campus protocol and follow the instructions in the buildings. Check the EUR website for the latest status.

Are you (or a roommate) in a high-risk group and worried about coming to campus? Consult with your manager/study advisor.
