Preparing for Online proctoring

Online proctoring means you will be remotely supervised during your examination. This is done by asking you to identify yourself prior to the examination and subsequently make a recording via the screenshare, webcam and microphone of your device and the camera of your mobile phone as a second camera.

Prepare

1 **week before the exam**

prepare for the exam with the requirements check and practice with the set-up of the technical aspects
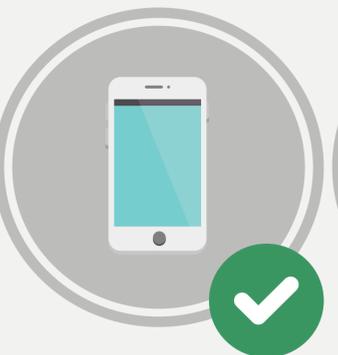

Second camera

In case the exam requires a second camera via your mobile phone or tablet, make sure you have installed the ProctorExam app.

Important

On the day of the exam, open **ANS** with Google Chrome and have ProctorExam extension up and running.

Technological aspects

You will need a computer with a webcam, microphone, Google Chrome and the ProctorExam extension, and a mobile phone as second camera with the ProctorExam app. Get the extension and app from the different **appstores**.

Taking the exam

Start the exam

Go to ANS via ans.app

Act as if it is a normal exam

No speaking, music or bathroom breaks are allowed
