

The EUR Basic Examiner Qualification (BEQ) is a qualification trajectory for teachers with the role of examiner. It goes more in depth on assessment than the UTQ. In this infographic you will find a visual representation of the BEQ trajectory. It consists of 3 sessions (MicroLabs). You can find more information about the content of the MicroLabs and when they are offered [here](#).

Do you want to apply for the BEQ? Please, send an email to training@risbo.eur.nl. Apply for the MicroLabs separately via [this link](#).

Your portfolio consisting of the three PoC's will be assessed for the **BEQ certificate**.
