

Day 1 Assignment update!

You and your teammates have a fruitful kick-off meeting. One of you even fancies one of the group a bit...

Take 2 resources of choice to start making progress in your project.

Day 2 Stakeholder Notification

You presented an "effective communication" workshop to the municipality and they loved it! It will be implemented in every Roffanova's community center.

Take either 2 CCI or 2 WW. Which one do you need the most?

Day 3 Stakeholder Notification

The municipality expected more AI-literate students and is unimpressed with your level of knowledge on digital interventions and problem solving.

Deactivate a wisdom or creativity location.

Day 4 Silent round

If you are reading this daybreak card your voice is muted in this round, you can't give your opinion. Will your teammates take your interests into consideration?

They get 1 extra resource to make the city more resilient, according to them.

Day 5 Assignment update!

Your academic skills help you to understand the challenge from multiple perspectives. Well done! Balance effect: which type of location is the least present in your city now? Activate a location of this type for free. Take a moment to reflect on your strategy and the type of city you are creating. What is your next step?

Day 6 Assignment update!

Your team lacks imagination and can't come up with anything remotely novel or interesting.

Hand in 1 resource of choice. Which one do you need the least?

Day 7 Stakeholder Notification

The mayor expresses her concern with your working tempo and is publicly addressing this, tarnishing the reputation of the university.

If you don't have a political location activated, you need to hand in 1 resource of choice.

Day 8 Stakeholder Notification

Exciting news! A local research initiative that works on fostering social urban networks has reached out and is willing to share their data and findings.

Take 3 wisdom whispers if you have the Data Cooperative activated, otherwise take 2 wisdom whispers.

Day 9 Midway Reflection

Is your vision coming to fruition?

If you are on track, you can deactivate a location of choice that doesn't fit the vision, and activate another location that costs the same amount of resources but is of a different category.

Day 10 GLITCH!

The virus is projecting false images onto citizens' devices. This creates a sense of doom and stress. Where do you meet to calm people down?

If you don't have the Community Garden activated, you need to deactivate another tile. Which one contributes the least to a resilient city?

Day 11 Assignment update!

Breakthrough! After a period of struggling one of your group members has a fantastic idea whilst on the toilet. Your teacher is thrilled and gives you positive feedback!

Take three resources of choice if you have the Wilderness activated. Otherwise, take 2 resources of choice.

Day 12 Stakeholder Notification

The municipality wants to have daily email updates and a weekly presentation of your progress. The extra workload needs to be divided. That means there is no time left to activate any locations this round.

The city is frozen! Is there something else you can do to make progress with your project?

Day 13 GLITCH!

The Virus hacked all energy-producing companies that pollute. Can you make sure that the city will have enough energy to provide its citizens?

If you don't have the Hydrogen Harbour activated, you need to deactivate a community location.

Day 14 Stakeholder Notification

The municipality is thrilled with your work! They want you to present your findings in the next community representatives meeting.

How do you want to realize your ambitions? Flip one final location that will help you do this for free.

Day 15 Final day

Remove all inactive locations from the grid.

What kind of city did you make? How does it ensure resilience? Is everyone's interests represented?

Day 0 Who is at the table?

Introduce yourself. Mention your values, interests and pitch your view on the city you want to create.

PS: Feel free to mix your own views with the ones from your character.

Suprise event Assignment update!

The university license for research software you were using for your project has expired.

Flip either a Wisdom location or a Creativity location back to its inactive state. Which one will it be?

Suprise event GLITCH!

No one in your group is responding e-mails, teams or whatsapp messages. It almost seems like the AI virus is invading your group.

Flip a teamwork location back to its inactive state.
