

From Science to Society

The era of science in ivory towers is over. Engaging with society is considered key. But why, and how?

**Impact
at the
Core**

From Science to Society

It is increasingly said. "Use your academic skills and knowledge to make societal impact."

But what does societal impact exactly mean?

Why is it important? And how do I engage different societal stakeholders?

This minor provides answers to these questions and brings you core principles of science communication and open science.

Minor Aspects

During this minor you will

- collaborating with students from various faculties and backgrounds
- work on a group projects
- go on field trips and/or visit stakeholders
- choose your own project together with fellow students

Minor programme

There are four thematic lines throughout the weeks: 1. *Project line*, 2. *Content line*, 3. *Communication line*, 4. *Group process*. In addition, a different theme stands central every week:

- **Week 1** Warming up & Kick-off
- **Week 2** Engaging with different stakeholders: what you should know
- **Week 3** Opening up the Research community
- **Week 4** Involving the Education community
- **Week 5** Contacting & Engaging Policymakers
- **Week 6** The role of Civil society organizations
- **Week 7** Doing science with business & Industry
- **Week 8** Feedback and preparation of symposium
- **Week 9** Interdisciplinary symposium
- **Week 10** Rounding up

We warmly welcome you for the Science to Society minor at Erasmus MC and EUR Rotterdam.
