Teachers on Learning Analytics

Our focus should be on the learner

- Facilitate students & help students to get the most out of themselves
- Personalized learning paths
- Facilitate teachers in using learning analytics: provide training
- Provide dashboards and standard reporting
- Insight in individual learning needs
- Oversight of frequent errors in formative tests

- Need to understand the data: so involve e.g. students for interpretation
- Insight in progress of students in a course

- Drawing the wrong conclusions
- Learning is more than assessments!

Concerns

Needs

- Involve the hard working but failing student

- Open up Canvas Learning analytics!

Conditions

- Student & teacher involvement
- Use the scientific process in creating learning analytics and dashboards

Erasmus University Rotterdam
Make it happen.
